## WORK EXPERIENCE

### Venturas Ltd

Software Engineer II

Remote (Tokyo, Japan)

Jan 2025 – Present

- Led **offshore development** for a fintech media client, ensuring timely delivery and team coordination
- Improved **RSS feed ingestion** speed by **3x** through **asynchronous processing** and architectural refinements
- Led Redis to **Valkey migration**, cutting AWS **ElastiCache** costs by **~20%** while ensuring uninterrupted user interactions

### Digital Payments Ltd (Pathao Pay)

Software Engineer I

Dhaka, Bangladesh

Jan 2023 – Jan 2025

- Integrated **Payment gateways** to provide a seamless wallet experience to **8 million** users on PathaoPay
- Secured tokenized payments with **RSA** cryptography, reducing vulnerabilities across **70%** of payment APIs
- Leveraged Grafana **k6** for load testing and benchmarking that resulted **~25x** boost in large-scale load generation
- Refactored **database** models of fund service, leading to a **30%** reduction in table size

### Robi Axiata Ltd

Specialist, Technical Assurance

Dhaka, Bangladesh

May 2022 – Dec 2022

- Optimized queries and procedures of **Oracle PL/SQL** reducing execution time by **15%**
- Automated **20+** reconciliation job and gray traffic barring system using Shell Scripts
- Upgraded VoIP detection model that reduced operational time and human efforts by **80%**

## SKILLS & Tools

- Programming: **Go**, **C++**, Javascript
- Microservices & DevOps: **Docker**, Kubernetes, **Kafka**, **Nginx**, CI/CD (**GitHub Actions**, CircleCI)
- Databases: **PostgreSQL**, **Redis** (Valkey), ElasticSearch, MongoDB, **Hadoop**
- Familiar with: WebSockets, Python, Node.js, Kong, HashiCorp Vault
- Methodologies: Test-Driven Development (TDD), Agile Practices, Payment Gateways, Security & Compliance

## COMPETITIVE PROGRAMMING SKILLS

- Participated in **11+** onsite contests, solved **1000+** different problems (Handle: **fardin\_abir**)
- Attended **ACM ICPC Dhaka Regional** 2018, 2019, 2020
- Champion**, Intra University Programming Contest, KU CSE Fest-2019
- UVA Global Rank: **2891**, **5\*** in HackerRank

## EDUCATION

### Khulna University

B.Sc. in Computer Science & Engineering

Khulna, Bangladesh

Jan 2017 – Feb 2022

- CGPA:** 3.38

## PROJECTS

### Turbo-Chat

Engineered Turbo-Chat a real-time chat application built on **NodeJS**, focusing on low-latency messaging. It features room-based messaging, online user tracking and other core functionalities. Integration of **Redis** with **WebSocket** speeds up message delivery performance by **10x**. Utilized **Kafka** for scaling and processing large volumes of messages.

### Auth Guard

A lightweight **JWT** based user **authentication** service developed in **Golang**. It offers robust user management functionalities with a strong emphasis on **security** and efficiency. Designed as an agile authentication solution, offering easy integration and reliable performance.

### Five Ayat Daily

Crafted '5 Ayat Daily' Telegram bot, facilitating daily Quran reading by delivering verses to subscribers. Utilized the **concurrency** and robustness of **Golang** over the **Telegram API** to deliver high responsive **Bot** service. By fostering community engagement, the project empowers subscribers to enhance their spiritual growth through regular engagement with the Quran.

## ADDITIONAL EXPERIENCE AND SKILLS

- Programming Instructor** (Feb 2021 – Aug 2021)  
Successfully trained **120+** school students under the '**Programming for Juniors**' course at Mojaru.
- General Secretary** (Jan 2020 – Jan 2021)  
Conducted several technical workshops and programming contests for **CLUSTER** (Club for Updated Search on Computer) at Khulna University.
